DETAILED ACTION

1. This action is responsive to communications: original application filed on 09/22/1999.

2. Claims 1-68 are presented in this application. Claims 1, 9-11, 18-20, 28-30, 39-41, 50-52, 59-61, and 67-68 are independent claims.

Election/Restrictions

- 3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-10 drawn to document processing, classified in class 715, subclass 501.1.
- II. Claims 11-19, 30-40, and 61-68 drawn controlling an image sensing position, classified in class 709, subclass 229.
- III. Claims 20-29 drawn to interpolating between two positions of an image input means, classified in class 382, subclass 300.
- IV. Claims 41-60 drawn to authenticating document to be submitted onto the network, classified in class 382, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as creating new document information by substituting an image in the document; invention II has separate utility

Application/Control Number: 09/667,638

Art Unit: 2176

such as updating an image in document information to be submitted via network; invention III has separate utility such as generating a new position that interpolates between two positions of the image input means; and invention VI has separate utility such as determining the candidate document as an authentic document to be submitted onto the network. See MPEP § 806.05(d).

- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, or Group III or Group IV, restriction for examination purposes as indicated is proper.
- 7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maikhanh Nguyen whose telephone number is (703) 306-0092. The examiner can normally be reached on Monday Friday from 9:00am 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph H Feild can be reached on (703) 305-9792.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
